Amendments to the Specification

Please replace the paragraph beginning on **page 11, line 29**, with the following rewritten paragraph:

Fig. 2 is a flowchart outlining one exemplary embodiment of a method for analyzing a written text according to this invention. Beginning in step S100, control continues to step S105, where the user selects a particular theory of discourse analysis. As discussed above, such theories include, but are not limited to the Linguistic Discourse Model, Discourse Structures Theory, the Rhetorical Structure Theory, the Systemic Functional Grammar and Tagmemics. For ease of explanation this exemplary embodiment assumes that the Linguistic Discourse Model has been selected. Next, in step S110, where the user may import a text into a text editing workspace. It will be apparent that the text may be entered directly into the system or the text may be entered into the system using any other method including text recognition of a printed or handwritten text, a voice entry system, a word processor such as EMACS, the UNIX editor vi, a wordprocessor such as Microsoft Corporation's Word $^{®}$ or any other known or later developed method or technique. The user may further edit a previously created text or may use the text editing workspace to generate new text for analysis.
